D. Loan-Backed Securities

- (1) Prepayment assumptions for loan-backed and structured securities are based on financial information provided by a licensed data provider. These assumptions are consistent with the current interest rate and economic environment. The retrospective method is used to value all types of these securities except in a situation where rate changes result in recalculation of the effective yield. The recalculated yield is used to amortize the investment as of the rate change date.
- (2) The Company has no loan-backed or structured securities for which an other-than-temporary impairment ("OTTI") was recognized due to intent to sell or inability or lack of intent to retain for a period of time sufficient to recover the amortized cost basis.
- (3) The Company has no loan-backed or structured securities for which an OTTI has been recognized due to the fact that the present value of cash flows expected to be collected is less than amortized cost basis of the securities.
- (4) The following table provides information about loan-backed securities and structured securities for which the carrying value exceeds fair value and the length of time that individual securities have continuously had amortized cost in excess of fair value, as of March 31, 2012:

Description of securities:	Less than 12 months		12 months or more		Total	
	Fair Value	Excess of Carrying Value over Fair Value	Fair Value	Excess of Carrying Value over Fair Value	Fair Value	Excess of Carrying Value over Fair Value
Special revenue	\$ -	\$ -	\$ 10,228,550	\$ (598,817)	\$ 10,228,550	\$ (598,817)
Total	\$ -	\$ -	\$ 10,228,550	\$ (598,817)	\$ 10,228,550	\$ (598,817)

For all loan-backed securities for which carrying value exceeds fair value, the Company has the intent and ability to retain the investment in the security for a period of time sufficient to recover the carrying value.

NOTES TO FINANCIAL STATEMENTS

(2) Fair Value Measurement in Level 3 of the Fair Value

Not Applicable.

(3) The Company recognizes transfers between levels of the fair value hierarchy as of the beginning of the quarter in which each transfer occurred.

(4) The Company categorizes its fair value measurements according to a three-level hierarchy. The hierarchy prioritizes the inputs used by the Company's valuation techniques. A level is assigned to each fair value measurement based on the lowest level input that is significant to the fair value measurement in its entirety. The three levels of the fair value hierarchy are defined as follows:

Level 1	Unadjusted quoted prices for identical assets or liabilities in active markets that are accessible at the measurement date.
Level 2	Prices or valuations based on observable inputs other than quoted prices in active markets for identical assets and liabilities.
Level 3	Prices or valuations that require inputs that are both significant to the fair value measurement and unobservable.

The Company uses valuation techniques consistent with the market and income approaches to measure the fair value of its assets and liabilities. The Company's market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities. The Company's income approach uses valuation techniques to convert future projected cash flows to a single discounted present value amount. When applying either approach, the Company maximizes the use of observable inputs and minimizes the use of unobservable inputs.

The following is a description of the valuation techniques used to measure fair value and the general classification of these instruments pursuant to the fair value hierarchy.

Bonds

Fair value is based on the price published by the SVO, if available. If an SVO price is not available, the fair value of bonds is based on quoted prices in active markets. If quoted prices are not available, fair values are obtained from third party pricing services, broker quotes or other model-based valuation techniques. Level 2 securities primarily include municipal bonds. The fair value of these Level 2 securities is based on a market approach with prices obtained from third party pricing services. Observable inputs used to value these securities can include: reported trades, benchmark yields, issuer spreads and non-binding broker quotes.

(5) The Company does not have any derivative assets or liabilities as of March 31, 2012.

B. Not applicable.

C. The following table provides the carrying value and the estimated fair value of financial instruments that are not reported at fair value as of March 31, 2012:

	<u>Carrying Value</u>	<u>Fair Value</u>
Financial Assets		
Bonds	\$ 878,205,373	\$ 906,896,845
Cash equivalents	\$ 15,924,962	\$ 15,924,962

Bonds

Fair value is based on the price published by the SVO, if available. If an SVO price is not available, the fair value of bonds is based on quoted prices in active markets. If quoted prices are not available, fair values are obtained from nationally recognized pricing services, broker quotes or other model-based valuation techniques.

Cash Equivalents

Cash equivalents include highly liquid investments with original maturities of one year or less. Cash equivalents are measured at amortized cost, which is a reasonable estimate of fair value because of the short time between the purchase of the instrument and its expected realization.
