D. Loan-Backed and Structured Securities

- (1) Prepayment assumptions for loan-backed and structured securities are based on financial information provided by a licensed data provider. These assumptions are consistent with the current interest rate and economic environment. The retrospective method is used to value all types of these securities except in a situation where rate changes result in recalculation of the effective yield. The recalculated yield is used to amortize the investment as of the rate change date.
- (2) The Company has no loan-backed or structured securities for which an other-than-temporary impairments ("OTTI") was recognized due to intent to sell or inability or lack of intent to retain for a period of time sufficient to recover the amortized cost basis.

NOTES TO FINANCIAL STATEMENTS

- (3) The Company has no loan-backed or structured securities for which an OTTI was recognized due to the fact that the present value of cash flows expected to be collected is less than amortized cost basis of the securities.
- (4) The following table provides information about investments in loan-backed and structured securities for which the carrying value (amortized cost) exceeds fair value and the length of time that individual securities have continuously had amortized cost in excess of fair value, as of March 31, 2015:

1. Less than 12 months	\$	(173,261)
2. 12 months or longer	\$	-

b. The aggregate related fair value of securities with unrealized losses:

1. Less than 12 months	\$	66,116,719
2. 12 months or longer	\$	-

Note 20 - Fair Value

A. Fair Value Measurements at March 31, 2015

- (1) The Company does not have any assets or liabilities reported at fair value as of March 31, 2015.
- (2) The Company does not have any level 3 of the Fair Value Measurements.
- (3) The Company recognizes transfers between levels of the value hierarchy as of the beginning of the quarter in which each transfer occurred.
- (4) The Company categorizes its fair value measurements according to a three-level hierarchy. The hierarchy prioritizes the inputs used by the Company's valuation techniques. A level is assigned to each fair value measurement based on the lowest level input that is significant to the fair value measurement in its entirety. The three levels of the fair value hierarchy are defined as follows:

Level 1	Unadjusted quoted prices for identical assets or liabilities in active markets that are accessible at the measurement date.
Level 2	Prices or valuations based on observable inputs other than quoted prices in active markets for identical assets and liabilities.
Level 3	Prices or valuations that require inputs that are both significant to the fair value measurement and unobservable.

The Company uses valuation techniques consistent with the market and income approaches to measure the fair value of its assets and liabilities. The Company's market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities. The Company's income approach uses valuation techniques to convert future projected cash flows to a single discounted present value amount. When applying either approach, the Company maximizes the use of observable inputs and minimizes the use of unobservable inputs.

The following is a description of the valuation techniques used to measure fair value and the general classification of these instruments pursuant to the fair value hierarchy.

Bonds

When available, fair value is based on quoted prices in active markets. If quoted prices are not available, fair values are obtained from third party pricing services, non-binding broker quotes or other model-based valuation techniques. Level 2 securities include municipal bonds. The fair value of these Level 2 securities is based on a market approach with prices obtained from third party pricing services. Observable inputs used to value these securities can include, but are not limited to, reported trades, benchmark yields, issuer spreads and non-binding broker quotes.

- (5) The Company does not have any derivative assets or liabilities as of March 31, 2015.

B. Not applicable.

C. The following table provides the carrying value and the estimated fair value of financial instruments that are not reported at fair value as of March 31, 2015:

	March 31, 2015					
	Aggregate Fair Value	Admitted Assets or Liabilities	Level 1	Fair Value Level 2	Level 3	Not Practicable (Carrying Value)
Financial Assets						
Bonds	\$ 1,482,169,441	\$ 1,419,574,606	\$ 6,129,390	\$ 1,456,050,281	\$ 19,989,770	\$ —
Cash equivalents	\$ 46,997,641	\$ 46,997,641	\$ —	\$ 46,997,641	\$ —	\$ —

Bonds

When available, fair value is based on quoted prices in active markets. If quoted prices are not available, fair values are obtained from third party pricing services, non-binding broker quotes or other model-based valuation techniques. Level 1

NOTES TO FINANCIAL STATEMENTS

securities include U.S. Treasury securities. Level 2 securities include municipal and corporate bonds, U.S. Agency Residential mortgage backed securities and asset backed securities. The fair value of these Level 2 securities is based on a market approach with prices obtained from third party pricing services. Observable inputs used to value these securities can include, but are not limited to, reported trades, benchmark yields, issuer spreads and non-binding broker quotes. Level 3 securities primarily include asset backed securities. The fair value of these Level 3 securities is based on a single non-binding broker quote. The underlying inputs used for the non-binding broker quotes are not readily available to the Company.

Cash Equivalents

Cash equivalents include highly liquid investments with original maturities of three months or less. Cash equivalents are classified as Level 2 and measured at amortized cost, which is a reasonable estimate of fair value because of the short time between the purchase of the instrument and its expected realization.

D. Not applicable.
