situation where rate changes result in recalculation of the effective yield. The recalculated yield is used to amortize the investment as of the rate change date.

- (4) The following table provides information about investments in loan-backed and structured securities for which the carrying value (amortized cost) exceeds fair value and the length of time that individual securities have continuously had amortized cost in excess of fair value, as of March 31, 2016:

NOTE 20 – FAIR VALUE MEASUREMENTS

A. Fair Value Measurements at March 31, 2016

- (1) The Company does not have any assets or liabilities reported at fair value as of March 31, 2016.
- (2) The Company does not have any level 3 of the Fair Value Measurements.
- (3) The Company recognizes transfers between levels of the value hierarchy as of the beginning of the quarter in which each transfer occurred.
- (4) The Company categorizes its fair value measurements according to a three-level hierarchy. The hierarchy prioritizes the inputs used by the Company's valuation techniques. A level is assigned to each fair value measurement based on the lowest level input that is significant to the fair value measurement in its entirety. The three levels of the fair value hierarchy are defined as follows:

Level 1	Unadjusted quoted prices for identical assets or liabilities in active markets that are accessible at the measurement date.
Level 2	Prices or valuations based on observable inputs other than quoted prices in active markets for identical assets and liabilities.
Level 3	Prices or valuations that require inputs that are both significant to the fair value measurement and unobservable.

The Company uses valuation techniques consistent with the market and income approaches to measure the fair value of its assets and liabilities. The Company's market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities. The Company's income approach uses valuation techniques to convert future projected cash flows to a single discounted present value amount. When applying either approach, the Company maximizes the use of observable inputs and minimizes the use of unobservable inputs.

- (5) The Company does not have any derivative assets or liabilities as of March 31, 2016

B. Not Applicable.

C. The following table provides the carrying value and the estimated fair value of financial instruments that are not reported at fair value as of March 31, 2016:

Type of Financial Instrument	Aggregate Fair Value	Admitted Assets	(Level 1)	(Level 2)	(Level 3)	Not Practicable (Carrying Value)
Bonds	\$ 1,594,269,929	\$ 1,524,912,557	\$ 6,053,729	\$ 1,588,216,200	\$	\$
Cash equivalents	38,495,150	38,495,150		38,495,150		
Mortgage loans	18,554,742	18,554,742			18,554,742	

Bonds

When available, fair value is based on quoted prices in active markets. If quoted prices are not available, fair values are obtained from third party pricing services, non-binding broker quotes or other model-based valuation techniques. Level 1 securities include U.S. Treasury securities. Level 2 securities include municipal and corporate bonds, U.S. Agency Residential mortgage backed securities and asset backed securities. The fair value of these Level 2 securities is based on a market approach with prices obtained from third party pricing services. Observable inputs used to value these securities can include, but are not limited to, reported trades, benchmark yields, issuer spreads and non-binding broker quotes.

NOTES TO FINANCIAL STATEMENTS

Cash Equivalents

Cash equivalents include highly liquid investments with original maturities of three months or less. Cash equivalents are classified as Level 2 and measured at amortized cost, which is a reasonable estimate of fair value because of the short time between the purchase of the instrument and its expected realization.

Mortgage loans on real estate

The fair value of commercial mortgage loans, except those with significant credit deterioration is determined by discounting contractual cash flows using discount rates that reflect current pricing for loans with similar remaining maturities, liquidity and characteristics including loan-to-value ratio, occupancy rate, refinance risk, debt-service coverage, location, and property condition. For commercial mortgage loans with significant credit deterioration, fair value is determined using the same adjustments as above with an additional adjustment for the Company's estimate of the amount recoverable on the loan. Given the significant unobservable inputs to this valuation, these measurements are classified as Level 3.
